ART UNIT PAPER NUMBER

3618

DATE MAILED: 11/16/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

10/691,960

Applicant(s)

MATSUYAMA, NOBUO

Examiner

Frank Vanaman

Art Unit

3618

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 31 August 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-5 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-5 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Status of Application

1. Applicant's amendment, filed Aug. 31, 2005, has been entered in the application. Claims 1-5 remain pending.

Claim Rejections - 35 USC § 112

2. Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 1, lines 6-7, it is not clear what positive structural relationship is being claimed by the phrase including "obtain better performance...", and it is further unclear what particular improvement to the performance is being referred to by the phrase.

Claim Rejections - 35 USC § 102

3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
4. Claims 1, 2, 3, and 5 (as dependent upon 1, 2, and 3) are rejected under 35 U.S.C. 102(b) as being anticipated by Bohrer (US 2002/0121399, published 5 September 2002, filed 21 February 2002). Bohrer teaches a hydraulically driven vehicle having a motor (16) driven by pressure oil from a pump (14) for driving the vehicle, wherein a maximum output set by a maximum angle of tilt of a swashplate of the pump or motor (see page 2, paragraph 0021, lines 7-9) may be changed (paragraph 0023) by an electronic control (22) under the effect of a selecting means (36), and further teaches that a maximum output may be set by a control (paragraph 0024, lines 3-7) in the form of a switch or potentiometer, and which may be manipulated by a service person operating that control (and performing as an operator to the breadth claimed).

Claim Rejections - 35 USC § 103

5. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Art Unit: 3618

6. Claims 4 and 5 (as dependent upon claim 4) are rejected under 35 U.S.C. 103(a) as being unpatentable over Bohrer (cited above). Bohrer teaches a hydraulically driven vehicle having a motor driven by pressure oil from a pump or driving the vehicle, wherein a maximum output set by a maximum angle of tilt of a swashplate of the pump or motor may be changed by an electronic control under the effect of a selecting means, and further teaches that a maximum output may be set by a control. Bohrer fails to teach the minimum tilt angle being adjustable. It is well known to adjust a lower end of a drive range to allow either a creep speed or to overcome internal friction in a drive train, and as such, it would have been obvious to one of ordinary skill in the art at the time of the invention to provide an adjustment for a minimum tilt angle so as to allow, for example, the setting of a creep speed or to provide a setting which overcomes internal friction in the drive train.

Response to Comments

7. Applicant's comments, filed with the amendment, have been carefully considered. Applicant's comments concerning the speed control mechanism of Bohrer operating in the highest gear are noted, but applicant has not pointed out any distinction between the reference and that material which is actually recited in applicant's claims. As regards Bohrer's setting of maximum travel speed, note that the paragraph previously clearly pointed out by the examiner in the first office action discloses that the value may be placed in a memory location, or set by a switch or potentiometer by a service person, who is operating that portion of the vehicle when setting the speed. Applicant has asserted that performance of the vehicle is not improved, however applicant has not further defined what constitutes an improvement. Applicant is reminded that claim 5 as dependent from claims 1-3 is treated clearly in the rejection under 35 USC 102, and claim 5 as dependent from claim 4 is grouped with the rejection of claim 4, although Bohrer anticipates the limitation set forth in claim 5 (note element 36 in Bohrer).

Note that while the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

As applicant undoubtedly is aware, during patent examination, the pending claims must be given their broadest reasonable interpretation consistent with the specification. In *re Hyatt*, 211 F.3d 1367, 1372, 54 USPQ2d 1664, 1667 (Fed. Cir. 2000). Applicant always has the opportunity to amend the claims during prosecution, and broad interpretation by the examiner reduces the possibility that the claim, once issued, will be interpreted more broadly than is justified. In *re Prater*, 415 F.2d 1393, 1404-05, 162 USPQ 541, 550-51 (CCPA 1969) The court explained that "reading a claim in light of the specification, to thereby interpret limitations explicitly recited in the claim, is a quite different thing from 'reading limitations of the specification into a claim,' to thereby narrow the scope of the claim by implicitly adding disclosed limitations which have no express basis in the claim." The court found that applicant was advocating the latter, i.e., the impermissible importation of subject matter from the specification into the claim.). See also *In re Morris*, 127 F.3d 1048, 1054-55, 44 USPQ2d 1023, 1027-28 (Fed. Cir. 1997).

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
